ABOUT US

PURBANCHAL COMPOSITE PANEL (INDIA) PVT. LTD. is a professionally managed company, set up to manufacture superlative quality of WPC and PVC laminates, which are 100% LEAD and formaldehyde emission free. Purbanchal Composite Panel strives to be a competitive force on a large scale with regard to all its business endeavors. Its mission is to attain economic prosperity and competence through Indian ethos and western work culture, an amalgamation of which can only lead to success and fruitful results. The main aim of the company is to provide services and products that are unmatched, making its customers vouch for it at any given time and recognize them as leading manufacturers and suppliers of WPC & PVC laminates. It is with the superlative quality of the products and services offered, the company strives to be popular as the only PVC laminate brand that comes to its clients' minds when they speak of quality and efficiency. The company sources the best raw materials for its WPC and PVC laminates to ensure top quality and offer multiple designs of PVC laminates to make your house or office a place you always imagined it to be like. We offer wooden colors, sparkle shades, fancy shades, solid colors, etc. You name it, desire it, order it and we make it. Enjoying a great market presence, the company has a praiseworthy high brand recall among its customers. Tapping the resources to the best possible, we have achieved a competitive advantage due to the technological innovation we exhibit and great customer satisfaction we deliver. For delivering international quality, we use hygienic and virgin raw materials to manufacture lead-free WPC & PVC laminates and supply it to massive chains of furniture manufacturers.

PVC LAMINATES

GHAR SAJAYE SAATH NIBHAYE

90°
BENDABLE
PVC DECORATIVE LAMINATES

SIZE: 2440 MM X 1220 MM

THICKNESS: 1.25 MM (±10%) 90° BENDABLE
: 1.5 MM (±10%) UV/NON BENDABLE

10 REASONS TO CHOOSE AMULYA MICA

100% Bacteria and Fungus Resistant

100% Lead Free Sheet

100% Termite and Borer Proof

100% Formaldehyde Emission Free

Non toxic sheet

Zero Maintenance

No shrinkage and swelling

90° Bendable, No Need of Edge Band

Fire Retardant

100% Waterproof for Lifetime

USES RECOMMENDATIONS

RANGE: • A wide variety is available in terms of designs, colors and texture.

ADHESIVE: • These laminates can be applied using Probond on Plywood surface and Heat X on PVC Board. However the better solution is the use of Lohmann laminate bonding tape available easily in the market. However use of heat activated adhesive is not recommended.

LAMINATION: • It is advisable to use proper substrates and observe standard bonding procedures to avoid any errors. Good quality plywood, high density particle board, or high quality fiber board should be used as substrates. Make sure that the face of the substrate is smooth and free of grease, wax, dust, chips and other foreign matter.

• Amulya Mica does not recommend use of any kind of coat like PU base, melamine, lamination (wax) on our products as our products are made from natural resources; hence application of such products can damage the originality and natural beauty of the laminate sheet.

CUTTING & MACHINING: • Make sure that you use standard tools and equipments to cut, rout and drill the products. The blades used shall be sharp. Use smooth file to feather all corner edges and to remove any burrs that may occur in the cutting process.

STORAGE & MAINTENANCE: • The laminates and the substrates shall be stored at the temperatures between 22°C and 32°C at relative humidity of 45.55%. Do not use any cleaning agent containing acids, alkalis or abrasive to clean the laminate. Direct exposure to sunlight shall be avoided.

WARRANTY: • Amulya Mica warrants that these products are free from manufacturing defects and are suitable to use under normal conditions. Inspect the product prior to installation. Company's liability shall be limited to the extent of the cost of the product only.

NOTE : PROTECTIVE FILM SHALL BE REMOVED ONLY AFTER INSTALLATION. PVC LAMINATE MEANT ONLY FOR INDOOR USE, DIRECT EXPOSURE TO SUNLIGHT SHALL BE AVOIDED.

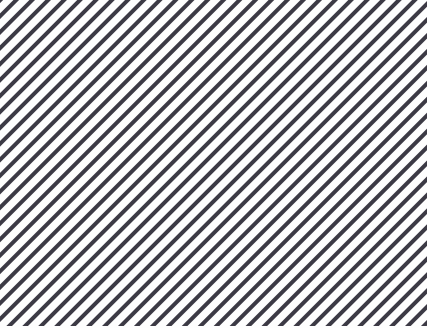

It is advisable to use V-Groove Cutter by giving a groove of 0.4 mm to 0.6 mm for bending the sheet upto 90°.

COLLECTION

CARE TO BE TAKEN

- Please inspect the product prior to installation.
- Do not keep the sheets in roll form at site. Open the roll & keep pressed between 2pcs of plywood.
- PVC laminate is meant for indoor application.
- Direct exposure to sunlight should be avoided.
- Cut the sheet from back side and with plywood cutting machine only. Do not use hand saw.
- Cover the edges of laminate with profile to avoid peeling/delamination.
- Do not use paper tape (abro etc.), duct tape, cello tape etc. On the design side of sheet.
- Recommended for vertical use only.
- It is advisable to use v-groove cutter to bend the laminate.
- Protective film should be removed only after installation.
- Company will not be responsible for any claim if the above precautions are not taken.
