WE DEPEND ON NATURE - AND WE CARE FOR IT

Wood has always remained in fashion for the simple reason that it's beauty adapts to time and changing architectural styles and tastes. Kaara is immensely lucky to work with such beautiful woods.

We comply with the environment protection standards which helps in preserving the forest eco system.

SIMPLICITY
IS THE ULTIMATE
SOPHISICATION

MAINTENANCE AND CARE

LACQUERED FLOORS:

The flooring is factory-lacquered with six layers of lacquer (UV) German Treffert Coating giving a hard and durable surface. It is therefore not necessary to lacquer the floor after laying.

CARE:

Lacquered floor requires almost no care, but should the floor begin to look slightly scratched, apply lacquer conditioner. When the lacquer becomes worn, the floor should be re-sanded and re-lacquered. It is important to do this before the lacquer is completely worn through.

DAILY CLEANING:

Normally it is sufficient just to vacuum-clean the floor or wipe it with a damp cloth.

PROTECT YOUR INTERNAL FLOOR:

Floors must be protected from seepage of water under the floor. In case water seeps into a floor and stays there then the edges of wooden floors swell because of water absorption and it can fade or damage your floor.

Place a suitable doormat near the entrance.

Remove stones and grit from the floor.

Place felt pads under the legs of furniture

Avoid sharp stiletto shoes

Wipe up water spillages.

SERVICES

We at Kaara believe that purchasing the best is just a part of the deal.
