# WHO WE'RE

One of the leading manufacturer of decorative Laminates. Neptune laminates is a global manufacturer and distributor of high pressure laminate used in furniture, office, retail space and other applications. The company sales decorative laminates and other engineered surface under the SWISS MICA brand.

SWISS MICA came with many distinguished designs and textures - stunning woodgrain, variety of plain colors, luxurious look of metallic laminates and even your own unique design in textures, glossy, matt, suede and other finishes.

You can find wide varieties of laminate designs in our laminate's catalog and choose the best laminate for your home, office or any premises. Laminate catalog will help you to find out the perfect laminate as it features the best laminate designs.

The company quality policy is to confirm the management system as per ISO 9001:2008 standard.

We design and develop laminate whose purpose is to be a constant motive of pride for our customers.

We place our customer's expectations at the heart of our actions, both internal and external. Our benchmark for achieving success is the satisfaction of our customers and their loyalty to the company.

Our activities are structured and systematically harmonized. Our strategic, orientation, quality awareness as well as the constant commitment of our management and staff leads us to excellent performance.

It is our goal to be world's leading laminate group in customer satisfaction and value creation.

| Sr. No.                 | PROPERTIES  | UNITS | SPECIFIED VALUE AS PER IS 2046-1995 type S, VGS | Obtained  |
| 1                       | Thickness   | mm    | 1.0(±10%)                                       | 1.0(±10%) |
| 2                       | Resistance to Surface Wear                                | Rev   | 150(Revolution)                                 | 180       |
| 3                       | Resistance to immersions boiling water                    |       |   |           |
|                         | - Mass increase(%)  | %     | 12.0(Maximum)                                   | 5         |
|                         | - Thickness increase(%)                                   | %     | 14.0(Maximum)                                   | 7         |
|                         | - Appearance  |       | Not Worse than 4                                | 5         |
| 4                       | Dimensional Stability at deviated temperature             |       |   |           |
|                         | - Longitudinal (%)  | (L)%  | 0.625(Maximum)                                  | 0.4       |
|                         | - Transverse(%)   | (L)%  | 1.10(Maximum)                                   | 0.74      |
| 5                       | Dimensional Stability at 20°C                             |       |   |           |
|                         | - Longitudinal (%)  | (L)%  | 0.425(Maximum)                                  | 0.3       |
|                         | - Transverse(%)   | (T)%  | 0.625(Maximum)                                  | 0.5       |
| 6                       | Resistance to impact by Small Diameter ball               | N     | 20 (Minimum)                                    | 30        |
| 7                       | Resistance to Cracking                                    | Grade | Not Worse than 4                                | 5         |
| 8                       | Resistance to Scratching                                  | N     | 1.75 (Minimum)                                  | 2         |
| 9                       | Resistance to Staining                                    | Grade |   |           |
|                         | a) Group 1 & 2  |       | Not Worse than 5                                | 5         |
|                         | a) Group 3 & 4  |       | Not Worse than 4                                | 5         |
| 10                      | Resistance to color change - in enclosed carbon are light | Grade | Not Worse than 5                                | 5         |
| 11                      | Resistance to Steam                                       | Grade | Not Worse than 4                                | 5         |
| 12                      | Resistance to Cigarette burn                              | Grade | Not Worse than 3                                | 3         |

Do not use nail and hammer while cutting such corner, grew, angle, designs.

Use only drill while cutting such corner, grew, Angle, Designs.

**Product Information**  
 Technical Name : High Pressure Decorative Laminated Sheet  
 Size : 2440 mm X 1220 mm

- Warranty :**
- SWISS MICA warrants that all its products are free from manufacturing defects.
  - The Products when properly used will vary with normal Deviation, to related manufacturing specifications.
  - In case of any claims, the liability of the company is limited to the cost of the product only.
  - Any Complaints, due to changes in climatic conditions will not be entertained by the company.
  - The warranty shall not be applied to defects or damage from any of the following:- Accidents, abuse or misuse, exposure to extreme fabrication or installation & improper maintenance.

**Care and Maintenance :**

- **Storage :** Sheets should be stored horizontally with the top sheet turned face down and a thick hard board placed on top to protect the material from possible damage and reduce the chance of getting warped store laminate stock should not be rotated such that order sheets will be used first. Laminate sheet should be protected from moisture, and should never be stored where they may come in contact with the floor or outside wall. Always carry the sheets vertically. Never slide the sheet but lift it while moving it from one place to another. Keep in mind that ideally two people should carry a full size sheet as carelessness can damage the decorative surface.
- **Abrasives :** Abrasive pads, scouring powders or cleansers may permanently damage the laminates surface making it susceptible to staining.
- **Harsh Chemicals :** Harsh chemicals such as oven cleaner, toilet cleaner or drain cleaner will etch and discolor the decorative surface. High pressure decorative laminates are not designed to resist continual contact with these chemicals. If any of these products spill over the surface, then remove immediately, rinse thoroughly, and wipe dry.
- **High Temperature Appliance :** Protect the surface from heat generating instrument such as pressing irons & electric cookers by using Insulated Pad.
- **Sharp Objects :** Never use knives or other sharp objects directly on the decorative surface.
- **Impact :** Even though high pressure decorative laminates have excellent impact resistance, chipping or cracking may occur. Do not abuse the high pressure decorative laminates by dropping heavy objects such as cans, dinnerware, or glasses or deliberately hammering directly on the surface.
- **Resistance to :** Boiling water, hot oil, direct heat, phenol, mild acid, rectified spirit, ink, etc.

**Cleaning**

- To clean the surface use damp cloth or sponge and a mild soap or detergent.
- Coffee or tea can be removed using a mild household cleaner/detergent and a soft bristle brush immediately on the surface.

**Note :**

- Please check laminate sheet before use.
- No claim will be entertained after using laminate sheet.
