

Marketed by:

Acrylic

6H Anti Scratch
100% Pure Acrylic
Same edge Banding Available

Enjoy the exquisite tastefulness of acrylic collection to enliven the presence of bright visionary ideas into your space!

The acrylic laminates line produced under the name collection of Acrylic comes with high-quality finesse and colour variances but there are a few warnings that the customer needs to be notified about before buying the beautiful line of Alimo products.

- Check the laminate products at the time of delivery. Keen eye for assurance of whether the goods weren't damaged in the transportation process.
- Before installation of the laminate line check for the substrate quality to be superior and of calibrated thickness.
- Make sure to clean the surface of the substrate utilised for any kind of dust or grease with the aforementioned cloth quality of micro fibre
- Stir the adhesive before using it. And do not mix water in the adhesive. Assure even spreading of adhesive with uniformity of a brush, roller or adhesive spreader on the acrylic line of laminates.
- Use the non-printed side of the substrate (Plywood, MDF, Particle Board) for the best results possible.
- Do not use any uneven surface of substrate because it could damage the or affect the acrylic laminate in its appearance and finishing and could increase the chances of appearance of air bubbles in future.
- Use only soft pinch roller or normal pressing on acrylic laminates on the substrate. Pressing should only be done from the middle of the panel and move towards the side line and corners of the panel so that air between the acrylic laminate and substrate will be removed.
- Make sure, to give sufficient amount of pressing to the acrylic laminates for almost 12hrs to 15hrs to achieve full bonding strength.
- Do not use synthetic rubber adhesive.
- Please avoid direct sunlight at all point for the acrylic laminates, colour and the finesse to be protected.
- Acrylic laminates is not to be utilised for placement of hot cookware directly. Prolonged exposure to high room temperatures may cause appearance of patches on the surface and damage the acrylic laminates from within.

Disclaimer : There can be colour variation in the material from different batches. It is advised to use same batch material to avoid colour variations. Actual colours of the Acrylic laminate sheets/Acrylic Edge banding may vary from this brochure.

LIGHT
WEIGHT

The flawless design structure of our acrylic sheets are engineered to be extremely light weight and easy to apply.

1.5mm
THICKNESS

advanced processing procures the right amount of manufactured thickness which provides forever strength to the laminate sheets.

DURABILITY
& STRENGTH

Our acrylic sheets developed with technologically advanced processing are Anti-Scratch and stain resistant.

TERMITE &
BORER FREE

The advanced sciences enables our acrylic sheets to fight against termites and borers for several years.

WATER &
STAIN PROOF

Our 6h acrylic sheets are manufactured to repel water and stains for a long time.

IDEAL FOR
VERTICAL
APPLICATION

The exemplary adhesion properties enables our collection of acrylic sheets to be presented in vertical

Available Size : 2440mm X 1220mm (8ft X 4ft)
