ADD THE
**LUXURY IN THE
KITCHEN**

- New highlight design
- Blends harmoniously into modern country kitchens or Scandi-style designs
- Classic farmhouse look, especially in new pure white Day
- Combines perfectly with trim parts in matt black Puro and a matching coloured mixer tap

PERFECTLY FITTED SINK INSTALLATION TYPE

Think a sink is just a sink? Far from it! Besides the selection of colours and models to choose from, you can also individualise your sink with the type of installation you opt for. Please see the product range summaries or the individual product pages for the different options available.

Topmount

Undermount

Flush-mount

Topmount installation

Classic installation type, dropped in from above, for all SCHOCK sink models and all worktop materials.

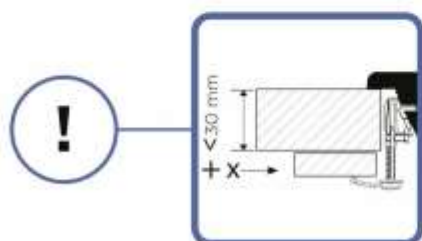

Undermount installation

Fashion-forward installation type for the majority of SCHOCK sink models and matching worktop materials.

Flush-mount installation

Exclusive, seamless installation for selected SCHOCK sink models and suitable worktop materials.

Recommended minimum worktop thickness:

Please note that if the sink is going to be installed with the help of our mounting brackets, we recommend a worktop thickness of 30-40 mm to ensure optimal grip. If the worktop is thinner than that, you will need to double up.
